

EXPERIMENT LIST

1	Understand the Android Integrated Development Environment (IDE) and develop a simple application that displays a "Hello Arzoo !!!" (replace your name) message.
2	
3	
4	
5	
6	Establish an HTTP connection to a web API and Display a response using Toast notifications.(Quote APP)
7	Create an application that automatically sends a reply upon receiving an SMS using
8	Identify and List nearby Bluetooth devices in the wireless range using BluetoothAdapter.

9	Develop an application that allows text communication over Bluetooth between two devices.
10	Measure and Display the signal strength of the connected Wi-Fi network using WifiManager.
11	Mark and Display the current GPS location of the device on Google Maps using the Maps SDK.
12	Demonstrate the use of a built-in sensor (e.g., accelerometer, gyroscope) by creating an application that reacts to motion or orientation.
13	Design and Implement a real-time chat application using Firebase Realtime Database and Firebase Authentication.
14	Integrate and Evaluate face detection capabilities in an application using Google ML Kit, highlighting detected facial features in real-time.
